

NBA Journey: End-to-end flow

RXNT & Relevate File import automation :

Automation	RXNT_Dataload_Auto
Type	a) File drop b) Looks for a pattern that contains “AVEO_PRJ002187” as string in the filename c) Files should be dropped in the /Import folder in SFMC sftp server
File Content- Logic behind the dates in the file.	a) If the timestamp field in the data file says “7/8/2024”, it’s for EHR impressions for week of 7/8/2024–7/14/2024.
Steps	
a.	• Upsert the records into “RXNT_Relevate_Import_Data” DE.
b.	• Performs match against “ent._ListSubscribers” and “ENT.Initial_AudList_ValidRecs_041124” and populates the email address.
c.	• Assigns the ranking for the NPIs exist in the ““RXNT_Relevate_Import_Data” DE.
d.	• Obtains the minimum ranking for an NPI and updates the RXNT_Relevate_Dataload_journeytrigger DE. • If an NPI has been ranked 1 and 5, then the record with the ranking 1 will be selected in the RXNT_Relevate_Dataload_journeytrigger DE.

Journeys in Journey Builder:

Journey	a) EHR_Prod_Journey_RXNT_Relevate
Schedule	a) Runs every Wednesday, at 12.30PM EST.
Steps	a) Decision Split: For every record, decision split logic runs the following rules. b) Below is the decision split logic for each path.

Journey	a) EHR_Prod_Journey_RXNT_RelevateBR4 - specifically for BR4 rule #3.
Schedule	b) Runs every Wednesday, at 12.30PM EST.
